

2024

Students in the Mathematics or Statistics admission categories may apply for one of these extra spaces upon completion of the required courses.

Students in admission categories from outside CMS are eligible to apply for one of these extra spaces upon completion of the required courses if they achieve:

- ◁ at least an A- in both CSC/MAT A67 and MAT A31 the first time that they complete those courses.

Those grades do not guarantee admission. They simply allow the student to apply.

There is a very high demand for Computer Science programs. We anticipate that the grades required to be admitted to one of these extra spaces to be much higher than the requirements for students in the CS admission category.

Retaking courses: When determining who is admitted to these extra spaces, we will only consider the first passing grade and all failing grades in the required courses. In other words, if you pass a course and then retake it, it will not in will

Mathematics

be competing with those students. Students will be selected based on their grades in CSC/MATA67, MATA22, MATA31, MATA37.

Retaking courses: Each of CSC/MATA67, MATA22, MATA37 may be retaken once for the purpose of admission to a Math Major or Specialist. If you do so, then we will consider the higher grade on the two attempts. If you withdraw from a course before the deadline to withdraw without academic penalty then it does not count as an attempt. If you pass MATA31 then you cannot retake it for the purpose of admission to a Math Major or Specialist; we will only consider your first passing grade for this course.
