

INSURANCE ADDENDUM

The University's general liability insurance remains in place and we have no exclusion for liability arising out of communicable disease. The Ministry of Colleges and Universities has confirmed that their workplace insurance coverage for unpaid placement continues for students during the COVID-19 pandemic and covers both students working remotely and in person.

In the event that a Student incurs a workplace injury or illness while in the course of the Placement, the Placement Site will immediately notify the University's Placement Coordinator and will work with the University to complete the appropriate WSIB (or Chubb Insurance) claim form(s). For a COVID-19 claim to be allowed, evidence must show that the student's risk of contracting the disease through their placement is greater than the risk to which the public at large is exposed and that work significantly contributed to the student's illness.

_____ (NAME) verify that I have read this statement on _____ (DATE) and will keep in contact with my Graduate Chair/Director of Clinical Training regarding my placement as appropriate.
